SOFTWARE DEVELOPMENT SERVICES

Since inception we have been providing state of the art Custom Software Solutions to midsize/large organizations. In developing custom software, we see our role as partners, not merely programmers. We recognize that solutions succeed not solely for technical reasons, but because end-users and internal IT staff feel ownership.

Our RAD model development capabilities offer significantly reduced development time and savings in developing, implementing and maintaining custom Enterprise applications.

In the last decade, a number of management philosophies have been developed in an attempt to define what companies must do to compete in the new global economy. Emphasis is now placed on the use of enterprise-wide information solutions to impact the decision processes of management. Organizations have rediscovered the basics, realizing that the most effective strategy is to organize their resources in order to achieve better performance. Today's dynamic business requirements need dynamic information solutions. Generic software is not flexible enough to meet the diverse demands of each unique business. Considering all the aspects in mind we design cost effective tailor built, high performance software for organizations that need made to order, high-end customized solutions

TECHNOLOGY INTEGRATION SERVICES

Businesses are evolving and becoming more and more demanding. Specialized software's are required to remove the functional barriers and improve organizational efficiency. Many corporations are still using systems that serve their standalone needs and have a hard time in communication. This means that a lot of time is spent on validating data, entering data into multiple systems and gathering data from many different systems. Time spent on these kinds of mundane tasks could be spent on serving your company's customers instead. Business Integration services give the ability to integrate the diverse data and information sources both within and outside your enterprise into a single coherent framework.

System integration enables communication between many independent systems and their processes. When we connect different systems and applications you get faster communication with a higher security in your internal and external processes. Flexible organizations, where cooperation and optimization for existing or new business areas are in focus, have already created and implemented software integration.

Wellness Home IT Solutions Software has abundance of experience and technical savoir faire in the integration of bu software. Our consultants have a solid experience from short problem solving activities to large integration solutions, where we have implemented efficiency and structure in the integration environment. Our experience in system architecture is well suited for implementing an architecture that does not bog down the company but instead ensures that the company can enjoy an IT-architecture that delivers on the demands of the business.

In recent years, the company has enjoyed grand success in the integration of enterprise software.

MIS OUTSOURCING

Wellness Home IT Solutions also provides MIS outsourcing services to small and medium sized businesses in order to improve their IT infrastructure and to streamline business processes and performance. We are currently relieving a number of SME's of the burden of having full time and costly internal IT employees. Using our team of professionals you will obtain the best of breed advice and expertise.

- ➢ Some of our clients outsource small portion or all of their IT support to us but they all benefit by having:
- ➢ Business Grade IT Support.
- ➢ Guaranteed Response Times.
- ➢ Expert Technology Advice.
- ➢ Broad Business Knowledge.
- ➢ Friendly Customer Service.
- ➢ Professional Trackable Systems.

CONSULTANCY SERVICES

Wellness Home IT Solutions enable you in creating a vision for the future and reach consensus on investment priorities and information technology strategies for all major constituencies. Importantly, we focus on aligning these strategies and investment priorities with the immediate, short-term, and long-range goals of your organization. Finally, moving from alignment to action, your information technology strategies are translated into a detailed

phasing/implementation plan that identifies specific projects, time frames, expected results, budget, resource needs, and organization (management and governance).
With Blackbud Software, this comprehensive and realistic action plan, or road map, becomes a "living document" that will guide your organization's investments of money, time, and energy related to information technology management over a multi-year period, incorporating new technology, e-commerce opportunities, and regulatory compliance.

Wellness Home IT Solutions is proudly providing consultancy services to large scale organizations and above all has team members on board who are not only Microsoft certified but also have tremendous experience in business consultancy
Unlike traditional technology-centric approaches to information management and e-commerce, we at Blackbud Software Consultancy Services focus on business transformation and applying our extensive experience in the Information Technology industry to help you:
Align your Information Technology strategy with your business processes.
Avoid pitfalls and ensure that IT initiatives are focused on the areas of highest "real value" to the organization.
Address targeted areas of improvement.
Enhance quality of care and support. Increase customer and employee satisfaction.
Strengthen financial results.

Wellness Home IT Solutions Consultants help devise an Information Technology strategic plan that serves as a "road map" to guide capital investments over a multi-year period and alternately can also provide a "second opinion" regarding your current Information Technology strategic plan, projects already in the planning stage and/or perform return on investment analyses as well as assisting organizations with plan implementation including tactical planning, vendor selection & contract negotiation, applications management, applications delivery and systems integration through sound trustworthy consulting services across IT Management, Business Analysis, Technology and HR consulting domains
